ELECTRICAL MACHINES AND WIRING SYSTEM BTE 315

COURSE OBJECTIVES

This course is designed for beginners in the electrical field. It is intended to expose students to the relevant knowledge and practical skills related to electrical machines and domestic electrical installations.

Materials uploaded so far

1. Direct Current Generators
2. Direct Current Motors
3. Alternating current Generators
4. Alternating Current Motors
5. Transformers
6. Domestic Installations
7. Electrical Measuring Instruments
